Ambitious group exhibition exploring art and design**About**

HS Projects transforms an empty office building into a five storey exhibition featuring site-specific installations, large-scale sculptures, paintings and video works which examine the interface between art and design. The exhibition brings together a diverse line-up of emerging and established artists to explore issues of the decorative and the functional through a range of new commissions and work never before seen in the UK. Participating artists include Beatriz Milhazes, Yutaka Sone, Kendall Geers, Simon Bedwell, Claire Barclay, David Shrigley, Elizabeth Neel, Harold Offeh, and Theo Stamatoyiannis, amongst several others.
